

Math Homework: Number Forms, Comparing & Number-Line Rounding

Student: Luna Lee

Date: September 16, 2026

Standard: CCSS.MATH.CONTENT.4.NBT.A.2-3 — Read, write, compare, and round whole numbers.

Mr. Kenny's Key Point

For every rounding problem, draw and label the number line, find halfway, mark the number, and compare distances. At halfway, explain our agreement to choose the greater end.

A. Number forms and place value

1. Write 564,087 in expanded form.

2. Write $30,000 + 7,000 + 800 + 2$ in standard form.

3. Write 100,002 in word form.

4. What is the value of the 6 in 268,041?

5. Write four hundred sixteen thousand, eighty-seven in standard form.

B. Compare and explain

6. Compare 38,675 ____ 9,100. Explain.

7. Compare 16,420 ____ $10,000 + 6,000 + 400 + 2$.

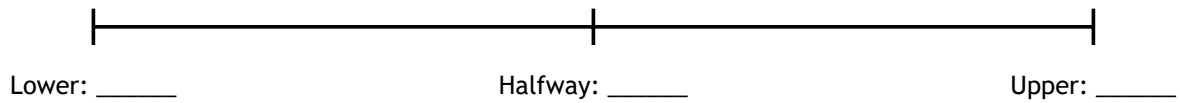

8. Compare without adding: $34,593 + 6,781$ ____ $34,593 + 6,609$.

9. Find all digits: $23,489 < 2\square,650 < 26,472$.

10. Population means the number of people living in a place. Use this textbook data: St. Louis 319,294; Anchorage 291,826; Oakland 390,724. Which TWO OTHER cities have populations not greater than Oakland? What does “not greater than” mean?

C. Rounding with a number line

11. Round **267** to the nearest **ten**. Label both ends and halfway. Mark 267 with a dot.

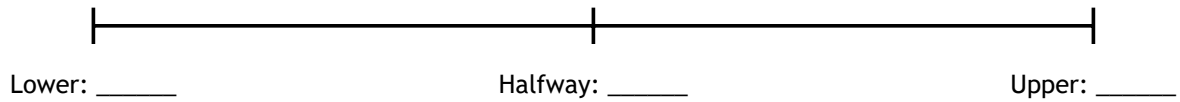

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

12. Round **450** to the nearest **hundred**. Label both ends and halfway. Mark 450 with a dot.

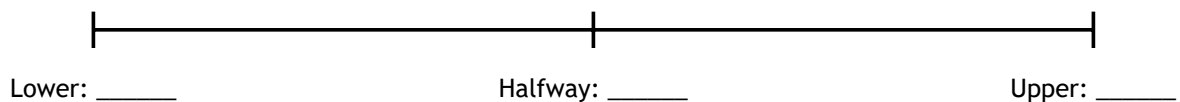

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

13. Round **478** to the nearest **hundred**. Label both ends and halfway. Mark 478 with a dot.

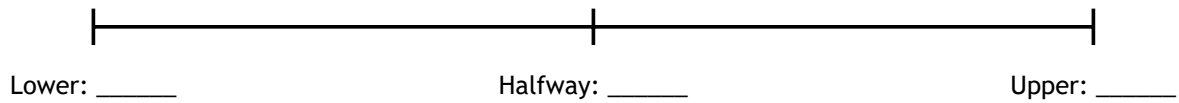

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

Continue: endpoints → halfway → distances

14. Round **3,641** to the nearest **thousand**. Label both ends and halfway. Mark 3,641 with a dot.

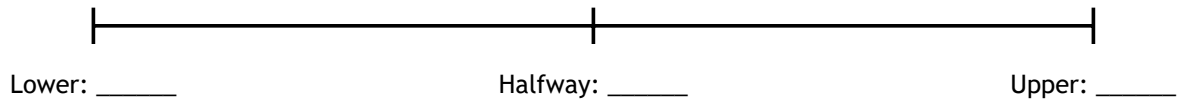

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

15. Round **6,500** to the nearest **thousand**. Label both ends and halfway. Mark 6,500 with a dot.

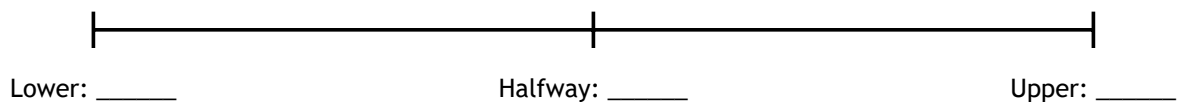

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

16. Round **9,426** to the nearest **thousand**. Label both ends and halfway. Mark 9,426 with a dot.

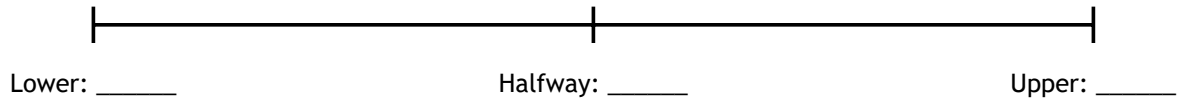

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

Continue: endpoints → halfway → distances

17. Round **17,139** to the nearest **thousand**. Label both ends and halfway. Mark 17,139 with a dot.

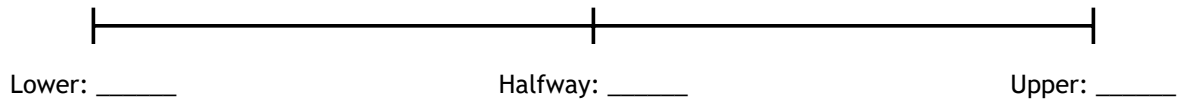

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

18. Round **70,628** to the nearest **ten thousand**. Label both ends and halfway. Mark 70,628 with a dot.

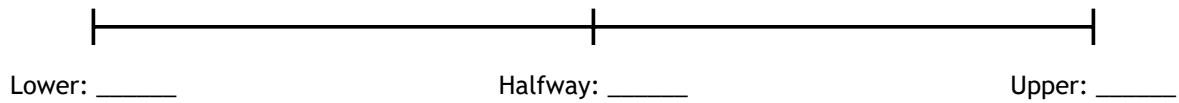

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

Continue: endpoints → halfway → distances

19. Round **148,796** to the nearest **hundred thousand**. Label both ends and halfway. Mark 148,796 with a dot.

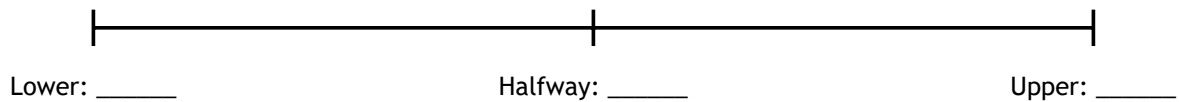

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

20. Round **824,137** to the nearest **ten thousand**. Label both ends and halfway. Mark 824,137 with a dot.

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____
