

Math Worksheet: Rounding: Number Lines, Halfway & Distance

Student: Luna Lee

Date: September 16, 2026

Standard: CCSS.MATH.CONTENT.4.NBT.A.3 — Use place value to round multi-digit whole numbers.

Mr. Kenny's Key Point

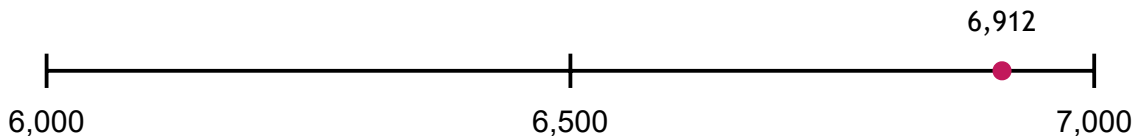

Draw a number line every time. Find two neighboring multiples, find halfway, and compare distances. At exactly halfway, neither end is closer: we agree to choose the greater number.

Rounding means choosing the nearest landmark

Rounding replaces a number with a nearby multiple of 10, 100, 1,000, and so on. We are asking **which end is closer?** We are not memorizing a next-digit trick.

Watch: 6,912 to the nearest thousand

1. The neighboring multiples are 6,000 and 7,000. Halfway is $(6,000 + 7,000) \div 2 = 6,500$.

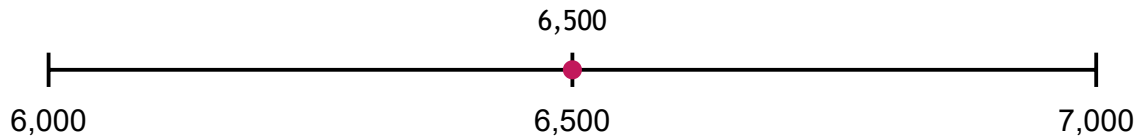

The distances are $6,912 - 6,000 = 912$ and $7,000 - 6,912 = 88$. 7,000 is closer because 88 is less than 912. **Rounded number: 7,000.**

Halfway is a tie

Watch: 6,500 to the nearest thousand

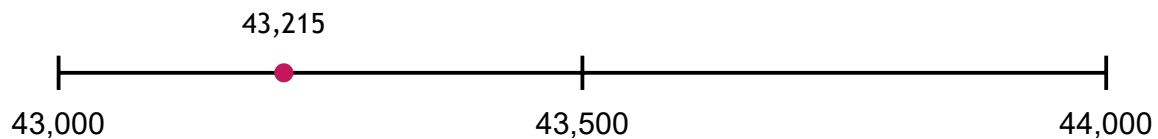

1. The neighboring multiples are 6,000 and 7,000. Halfway is $(6,000 + 7,000) \div 2 = 6,500$.

The distances are $6,500 - 6,000 = 500$ and $7,000 - 6,500 = 500$. The distances are equal. Neither end is closer. We agree to choose the greater end at halfway. **Rounded number: 7,000.**

Try a new interval: 43,215 to the nearest thousand

1. The neighboring multiples are 43,000 and 44,000. Halfway is $(43,000 + 44,000) \div 2 = 43,500$.

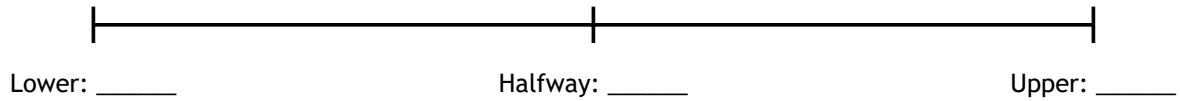

The distances are $43,215 - 43,000 = 215$ and $44,000 - 43,215 = 785$. 43,000 is closer because 215 is less than 785. **Rounded number: 43,000.**

Our five steps

1. Find the lower and upper neighboring multiples.
2. Draw and label the number line.
3. Find halfway: lower + half the gap.
4. Mark the number and compare distances.
5. Choose the closer end. For a tie, choose the greater end.

Practice 1-3: draw, locate, and decide

1. Round **243** to the nearest **ten**. Label both ends and halfway. Mark 243 with a dot.

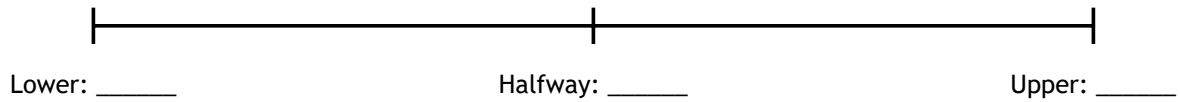

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

2. Round **245** to the nearest **ten**. Label both ends and halfway. Mark 245 with a dot.

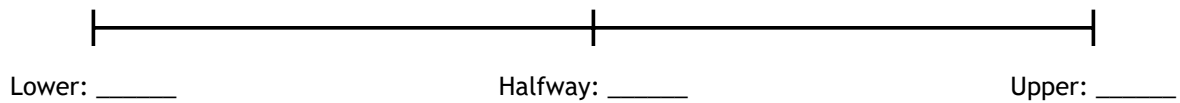

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

3. Round **254** to the nearest **ten**. Label both ends and halfway. Mark 254 with a dot.

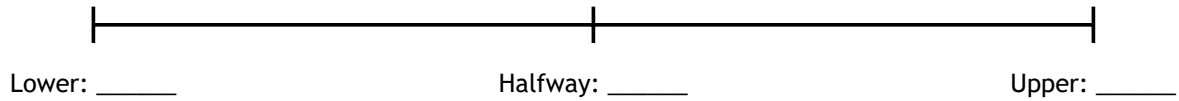

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

Practice 4-6: draw, locate, and decide

4. Round **449** to the nearest **hundred**. Label both ends and halfway. Mark 449 with a dot.

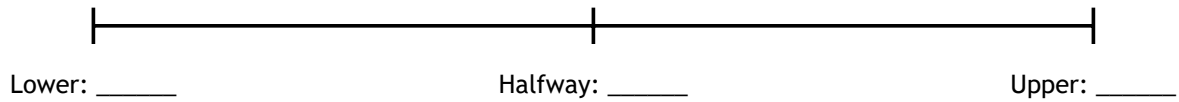

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

5. Round **450** to the nearest **hundred**. Label both ends and halfway. Mark 450 with a dot.

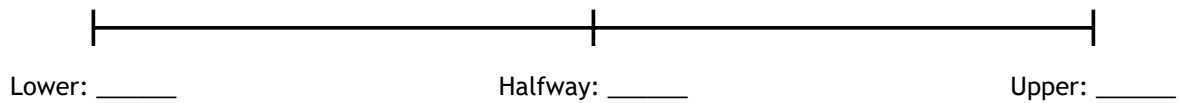

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

6. Round **6,912** to the nearest **thousand**. Label both ends and halfway. Mark 6,912 with a dot.

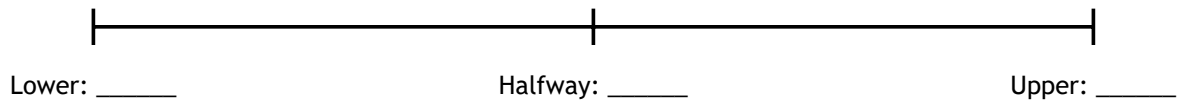

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

Practice 7-9: draw, locate, and decide

7. Round **5,379** to the nearest **thousand**. Label both ends and halfway. Mark 5,379 with a dot.

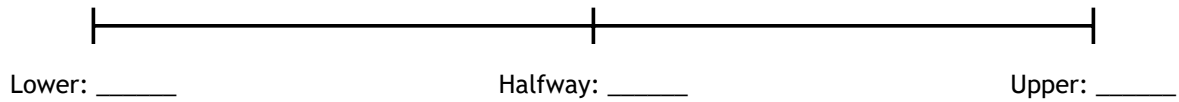

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

8. Round **43,215** to the nearest **thousand**. Label both ends and halfway. Mark 43,215 with a dot.

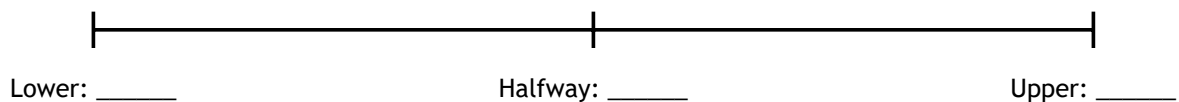

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

9. Round **70,628** to the nearest **ten thousand**. Label both ends and halfway. Mark 70,628 with a dot.

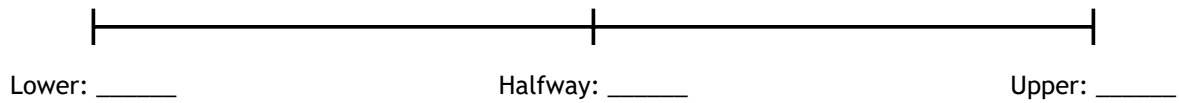

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

Practice 10-12: draw, locate, and decide

10. Round **385,617** to the nearest **ten thousand**. Label both ends and halfway. Mark 385,617 with a dot.

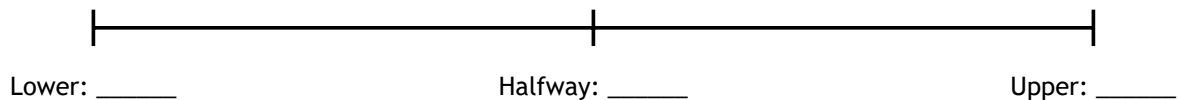

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

11. Round **362,113** to the nearest **hundred thousand**. Label both ends and halfway. Mark 362,113 with a dot.

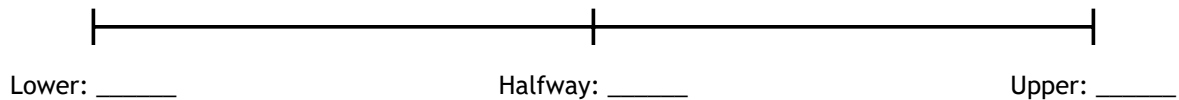

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____

12. Round **982,638** to the nearest **thousand**. Label both ends and halfway. Mark 982,638 with a dot.

Distance to lower: _____ Distance to upper: _____

Closer end (or equal distances): _____

Rounded number: _____
